Editorial Review

Review

"I think the health notes and chapter introductions are well done. The chapter introductions provides students with motivation for learning the material and a real-life situation to which this material will apply." - PJ Ball, Northern Kentucky University

"I chose Armstrong because it was organized around reaction types for the organic chemistry section. I also like the core problems in the middle of the chapters...I am very satisfied." - Janet Maxwell, Angelo State University

About the Author

Jim Armstrong attended Harvard University as an undergraduate student and then moved to the West coast for graduate school. Since earning his Master's degree at the University of California at Berkeley, Jim has taught in the California community college system. He has been on the faculty of City College of San Francisco for the past 20 years, during which time he has taught the full range of lower-division chemistry courses, with particular emphasis on the single-term GOB course. Ten years ago, he collaborated with the CCSF biology and nursing departments on an extensive revision of the GOB curriculum, and the success of the course revision led to the writing of this textbook. Besides teaching and writing, Jim enjoys playing piano and trombone, collecting topographic maps, bird watching, and doting on his wonderful twin daughters.
