# Mastering ASP.NET Web API

By Mithun Pattankar, Malendra Hurbuns

Mastering ASP.NET Web API By Mithun Pattankar, Malendra Hurbuns

Leverage ASP.Net Web API to build professional web services and create powerful applications.

About This Book

- Get a comprehensive analysis of the latest specification of ASP.NET Core and all the changes to the underlying platform that you need to know to make the most of the web API
- See an advanced coverage of ASP.NET Core Web API to create robust models for your data, create controllers, and handle routing and security
- This book is packed with key theoretical and practical concepts that can be instantly applied to build professional applications using API with Angular 4, Ionic, and React

Who This Book Is For

This book is for .Net developers who wants to Master ASP.NET Core (Web API) and have played around with previous ASP.NET Web API a little, but don't have in-depth knowledge of it. You need to know Visual Studio and C#, and have some HTML, CSS, and JavaScript knowledge.

What You Will Learn

- Acquire conceptual and hands-on knowledge of ASP.NET Core (MVC & Web API)
- Learn about HTTP methods, the structure of HTTP content, internet media types, and how servers respond to HTTP requests and their associated HTTP codes
- Explore middleware, filters, routing, and unit testing
- Optimize Web API implementations
- Develop a secure Web API interface
- Deploy Web API projects to various platforms
- Consume your web API in front end application based on Angular 4, Bootstrap, and Ionic

- Implement and explore the current trends in service architecture

In Detail

Microsoft has unified their main web development platforms. This unification will help develop web applications using various pieces of the ASP.NET platform that can be deployed on both Windows and LINUX. With ASP.NET Core (Web API), it will become easier than ever to build secure HTTP services that can be used from any client.

Mastering ASP.NET Web API starts with the building blocks of the ASP.NET Core, then gradually moves on to implementing various HTTP routing strategies in the Web API. We then focus on the key components of building applications that employ the Web API, such as Kestrel, Middleware, Filters, Logging, Security, and Entity Framework.Readers will be introduced to take the TDD approach to write test cases along with the new Visual Studio 2017 live unit testing feature. They will also be introduced to integrate with the database using ORMs. Finally, we explore how the Web API can be consumed in a browser as well as by mobile applications by utilizing Angular 4, Ionic and ReactJS.

By the end of this book, you will be able to apply best practices to develop complex Web API, consume them in frontend applications and deploy these applications to a modern hosting infrastructure.

Style and approach

Using a hands-on approach, we cover both the conceptual as well as the technical aspects of the ASP.NET Core (Web API) framework.

Editorial Review

About the Author

Mithun Pattankar

Mithun Pattankar, who hails from Kalaburgi and lives in Bangalore, India, works with the leading MNC as a consultant. He has been developing .NET-based applications for over 12 years now. He has an industry-wide experience in building Desktop Apps (WPF), Web Apps (ASP.NET and client-side frameworks), and Hybrid Mobile apps (Ionic). He is involved in all aspects of application development, and mentors his junior team members. He has been actively working on building ASP.NET Web APIs for different frontends and conducts technical training as well. Mithun believes in eating sattvic food for healthy living and loves spending time doing socio-spiritual activities. He occasionally blogs on mithunvp and can be reached on Twitter at @mithunpattankar.

Malendra Hurbuns

Malendra Hurbuns is from South Africa, and lives in New Zealand, working for an Australian Company as a senior software developer. He has been developing in .NET for over 15 years. He mentors other developers and is involved in all aspects of development. He loves writing simple code that has a high quality. He is one of the pioneers in web API in his role, and he has implemented many live systems using ASP.NET Web APIs. TDD is also a topic close to his heart. He has worked in the accounting, banking, and simulation industries, which has provided him with a wealth of experience. He is a keen cyclist and swimmer.

Users Review

From reader reviews:

Christopher Clarke:

Do you have favorite book? In case you have, what is your favorite's book? Book is very important thing for us to be aware of everything in the world. Each book has different aim as well as goal; it means that publication has different type. Some people really feel enjoy to spend their the perfect time to read a book. They are reading whatever they take because their hobby is usually reading a book. What about the person who don't like reading a book? Sometime, person feel need book when they found difficult problem or even exercise. Well, probably you will need this Mastering ASP.NET Web API.

Candice Foushee:

This Mastering ASP.NET Web API book is just not ordinary book, you have it then the world is in your hands. The benefit you get by reading this book will be information inside this publication incredible fresh, you will get information which is getting deeper an individual read a lot of information you will get. This

specific Mastering ASP.NET Web API without we realize teach the one who examining it become critical in considering and analyzing. Don't become worry Mastering ASP.NET Web API can bring if you are and not make your case space or bookshelves' turn into full because you can have it with your lovely laptop even phone. This Mastering ASP.NET Web API having good arrangement in word and also layout, so you will not really feel uninterested in reading.

Rhonda Kirby:

Playing with family inside a park, coming to see the ocean world or hanging out with friends is thing that usually you could have done when you have spare time, in that case why you don't try factor that really opposite from that. One particular activity that make you not sense tired but still relaxing, trilling like on roller coaster you are ride on and with addition of information. Even you love Mastering ASP.NET Web API, it is possible to enjoy both. It is great combination right, you still wish to miss it? What kind of hangout type is it? Oh can happen its mind hangout guys. What? Still don't get it, oh come on its called reading friends.

Manuel Frazier:

What is your hobby? Have you heard that will question when you got college students? We believe that that question was given by teacher on their students. Many kinds of hobby, Everyone has different hobby. So you know that little person similar to reading or as looking at become their hobby. You should know that reading is very important in addition to book as to be the factor. Book is important thing to provide you knowledge, except your own teacher or lecturer. You discover good news or update in relation to something by book. Many kinds of books that can you choose to adopt be your object. One of them are these claims Mastering ASP.NET Web API.
