Understanding Nursing Research: Building an Evidence-Based Practice, 5e

By Nancy Burns PhD RN FCN FAAN, Susan K. Grove PhD RN ANP-BC GNP-BC

Learn how to evaluate and apply research with the #1 nursing research book! **Understanding Nursing Research: Building an Evidence-Based Practice** is known for its authoritative content, a time-tested step-by-step approach, and abundant use of research examples. With improved clarity and readability, the new edition strengthens its focus on evidence-based practice to better demonstrate how the steps of the research process relate to evidence-based nursing. Written by two of the leaders in the field of nursing research, Nancy Burns and Susan K. Grove, this full-color text offers unique insights into understanding, appraising, and applying published research to evidence-based practice.

- **Authoritative content** is written by two of the true pioneers in nursing research, who offer unique, first-hand insights into the field.
- **Research examples** provide practice in working with published studies, with many of the examples including *Critical Appraisal* and *Implications for Practice* sections.
- **A clear, step-by-step organization** introduces the research process and demonstrates how this systematic framework relates to evidence-based practice.
- **An expanded emphasis on evidence-based practice** helps you develop skills in studying and appraising published research, so you are prepared for your role in working with research evidence.
- **Enhanced coverage of qualitative research** allows prepares you to approach research questions and clinical questions with an unbiased view of the researcher's methodology.
- **Two different appraisal processes** are included:
 - **A traditional in-depth critical appraisal process** prepares you for graduate-level work in research.
 - **A concise, practice-focused research appraisal process** equips you for quick and accurate evaluation of the applicability of research findings to clinical practice.

- **Updated research examples** prepare you for evidence-based practice by using the physiologic conditions and hospitalized patients seen in clinicals.
