Fuzzy Logic-Based Modeling in Collaborative and Blended Learning By Sofia J. Hadjileontiadou

Technology has dramatically changed the way in which knowledge is shared within and outside of traditional classroom settings. The application of fuzzy logic to new forms of technology-centered education has presented new opportunities for analyzing and modeling learner behavior.

Fuzzy Logic-Based Modeling in Collaborative and Blended Learning explores the application of the fuzzy set theory to educational settings in order to analyze the learning process, gauge student feedback, and enable quality learning outcomes. Focusing on educational data analysis and modeling in collaborative and blended learning environments, this publication is an essential reference source for educators, researchers, educational administrators and designers, and IT specialists.

This premier reference monograph presents key research on educational data analysis and modeling through the integration of research on advanced modeling techniques, educational technologies, fuzzy concept maps, hybrid modeling, neuro-fuzzy learning management systems, and quality of interaction.

Editorial Review

Review

This book provides a valuable contribution to the existing literature of e-learning and related research methodologies. It offers both a breadth and depth of coverage in issues linking fuzzy logic, e-learning, collaborative and blended learning, instructional design and knowledge modelling, along with efficient analytical tools that cannot be easily found elsewhere. This book should be included in any academic and research library since it can serve as a valuable resource and reference book for academics, researchers, educators, post graduate students and practitioners in a full range of e-learning fields. --*Professor Athanassios Jimoyiannis, Department of Social and Educational Policy, University of Peloponnese, Greece*

About the Author

Sofia J. Hadjileontiadou received the Diploma degree in Civil Engineering in 1986 and the Ph.D. degree in Educational Technology in 2000, both from the Aristotle University of Thessaloniki (AUTH), Thessaloniki, Greece. She also holds a Msc in Environmental Engineering. Currently, she is principal of SEK an educational structure within VET, tutor at the Master's in Education (M.Ed) program of the Hellenic Open University and research associate at the 1-Year Programme of Pedagogical Training (EPPAIK) at the School of Pedagogical and Technological Education of Greece. She received the best full paper award at the ICALT'2004 conference of IEEE. Her research interests include educational technology, ICT mediated collaboration, blended learning, innovation in didactics, environmental education and fuzzy logic applications upon educational data. She has published 20 papers in peer reviewed international journals, 40 papers in peer reviewed international conference proceedings and 7 book chapters. She is a member of the Technical Chamber of Greece, the Greek Society of the Teachers of Environmental Education and the Greek Scientific Society of ICT in Education.

Sofia B. Dias currently works as a Researcher Assistant at the Faculty of Human Kinetics, University of Lisbon, Portugal. She embraced a Ph.D. in Science Education, specialty of Analysis and Organization of Educational Systems, financed by a project grant awarded by the Foundation for Science and Technology (FCT-Portugal). In 2007 she received an award of the Best Students University of Lisbon (UTL/Santander). She has published 2 books, 1 book chapter, 5 papers in peer reviewed international journals and 7 papers in peer reviewed international conference proceedings. Since 2011 she is peer reviewer of several international journals, namely: Computers & Education, The Internet & Higher Education, Interactive Learning Environments, Educational Research & Reviews, Academic Proceedings in Engineering Sciences, Systems, and Journal of Medical Internet Research. Just recently, she has won a 5-year FCT Postdoctoral grant for exploring blended, collaborative and affective learning in Higher Education. Her research interests and current projects focus on blended learning, ICT in education, learning management systems and intelligent modelling of learning processes.

Users Review

From reader reviews:

Nathan Herr:

Do you certainly one of people who can't read satisfying if the sentence chained inside straightway, hold on guys this kind of aren't like that. This Fuzzy Logic-Based Modeling in Collaborative and Blended Learning

book is readable by means of you who hate the straight word style. You will find the information here are arrange for enjoyable reading experience without leaving possibly decrease the knowledge that want to deliver to you. The writer associated with Fuzzy Logic-Based Modeling in Collaborative and Blended Learning content conveys prospect easily to understand by many people. The printed and e-book are not different in the articles but it just different in the form of it. So , do you still thinking Fuzzy Logic-Based Modeling in Collaborative and Blended Learning is not loveable to be your top list reading book?

John Folsom:

The particular book Fuzzy Logic-Based Modeling in Collaborative and Blended Learning will bring someone to the new experience of reading the book. The author style to elucidate the idea is very unique. Should you try to find new book to study, this book very ideal to you. The book Fuzzy Logic-Based Modeling in Collaborative and Blended Learning is much recommended to you to see. You can also get the e-book from your official web site, so you can easier to read the book.

Christine Flint:

Reading can called thoughts hangout, why? Because while you are reading a book mainly book entitled Fuzzy Logic-Based Modeling in Collaborative and Blended Learning the mind will drift away trough every dimension, wandering in every single aspect that maybe unfamiliar for but surely will become your mind friends. Imaging every word written in a e-book then become one type conclusion and explanation which maybe you never get ahead of. The Fuzzy Logic-Based Modeling in Collaborative and Blended Learning giving you a different experience more than blown away your brain but also giving you useful facts for your better life with this era. So now let us explain to you the relaxing pattern the following is your body and mind will likely be pleased when you are finished studying it, like winning a casino game. Do you want to try this extraordinary investing spare time activity?

Delilah Jordan:

As a pupil exactly feel bored to reading. If their teacher requested them to go to the library or make summary for some publication, they are complained. Just tiny students that has reading's heart or real their leisure activity. They just do what the professor want, like asked to go to the library. They go to right now there but nothing reading critically. Any students feel that looking at is not important, boring along with can't see colorful photographs on there. Yeah, it is to be complicated. Book is very important to suit your needs. As we know that on this period, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country. Therefore this Fuzzy Logic-Based Modeling in Collaborative and Blended Learning can make you really feel more interested to read.
