How Humans Learn to Think Mathematically: Exploring the Three Worlds of Mathematics (Learning in Doing: Social, Cognitive and Computational Perspectives) By David Tall

How Humans Learn to Think Mathematically describes the development of mathematical thinking from the young child to the sophisticated adult. Professor David Tall reveals the reasons why mathematical concepts that make sense in one context may become problematic in another. For example, a child's experience of whole number arithmetic successively affects subsequent understanding of fractions, negative numbers, algebra, and the introduction of definitions and proof. Tall's explanations for these developments are accessible to a general audience while encouraging specialists to relate their areas of expertise to the full range of mathematical thinking. The book offers a comprehensive framework for understanding mathematical growth, from practical beginnings through theoretical developments, to the continuing evolution of mathematical thinking at the highest level.

Editorial Review

About the Author

David Tall is Emeritus Professor of Mathematical Thinking at the University of Warwick. He is internationally known for his research into long-term mathematical development at all levels, from preschool to the frontiers of research, including in-depth studies explaining mathematical success and failure.

Users Review

From reader reviews:

Nick Zapata:

What do you consider book? It is just for students since they're still students or that for all people in the world, what best subject for that? Merely you can be answered for that query above. Every person has several personality and hobby for every other. Don't to be compelled someone or something that they don't want do that. You must know how great along with important the book How Humans Learn to Think Mathematically: Exploring the Three Worlds of Mathematics (Learning in Doing: Social, Cognitive and Computational Perspectives). All type of book could you see on many sources. You can look for the internet solutions or other social media.

Robert Johnson:

This book untitled How Humans Learn to Think Mathematically: Exploring the Three Worlds of Mathematics (Learning in Doing: Social, Cognitive and Computational Perspectives) to be one of several books in which best seller in this year, this is because when you read this book you can get a lot of benefit onto it. You will easily to buy this specific book in the book store or you can order it by means of online. The publisher with this book sells the e-book too. It makes you quickly to read this book, as you can read this book in your Smartphone. So there is no reason to your account to past this publication from your list.

Jeffrey Barclay:

People live in this new morning of lifestyle always try to and must have the free time or they will get lots of stress from both lifestyle and work. So , whenever we ask do people have time, we will say absolutely indeed. People is human not really a robot. Then we inquire again, what kind of activity do you have when the spare time coming to a person of course your answer will unlimited right. Then do you ever try this one, reading books. It can be your alternative with spending your spare time, the actual book you have read is actually How Humans Learn to Think Mathematically: Exploring the Three Worlds of Mathematics (Learning in Doing: Social, Cognitive and Computational Perspectives).

Debra Treat:

That guide can make you to feel relax. This specific book *How Humans Learn to Think Mathematically: Exploring the Three Worlds of Mathematics (Learning in Doing: Social, Cognitive and Computational Perspectives)* was vibrant and of course has pictures around. As we know that book *How Humans Learn to Think Mathematically: Exploring the Three Worlds of Mathematics (Learning in Doing: Social, Cognitive and Computational Perspectives)* has many kinds or category. Start from kids until young adults. For example *Naruto* or *Detective Conan* you can read and believe that you are the character on there. So , not at all of book are generally make you bored, any it makes you feel happy, fun and unwind. Try to choose the best book for you personally and try to like reading that.
