## Lamps and Lighting By M.A. Cayless

This book is a comprehensive guide to the theory and practice of lighting. Covering the physics of light production, light sources, circuits and a wide variety of lighting applications, it is both suitable as a detailed textbook and as thoroughly practical guide for practising lighting engineers.

This fourth edition of Lamps and Lighting has been completely updated with new chapters on the latest lamp technology and applications. The editors have called upon a wide range of expertise and as a result many sections have been broadened to include both European and US practice.

The book begins with a description of the fundamentals of light, vision, colour and measurement. Part II, the main section of the book, deals with lamps and control equipment and includes descriptions of all lamp types in use today. Part III on lighting covers both interior and exterior applications.

## **Editorial Review**

### **Review**

'An essential purchase for building services engineers, architects and lighting industry specialists'\*The Lighting Journal\*\*'A book that all lighting engineers should have as a reference, and students should have access to ... well written and presented, and has much useful information ... it is good to see the new edition'\* CIBSE Newsletter

### **From the Publisher**

This definitive book on lamps (light sources) and lighting (applications) is fully updated and discusses new technology such as electrodeless lamps. It covers theories of light and vision and examines the research, production, and development of all types of lamps as well as various applications such as floodlighting and interior lighting. Features new material on electrodeless lamps. Outlines both UK and US standards and practices. Contains numerous illustrations and photographs.

### **From the Back Cover**

This book is a comprehensive guide to the theory and practice of lighting. Covering the physics of light production, light sources, circuits and a wide variety of lighting applications, it is both suitable as a detailed textbook and as thoroughly practical guide for practising lighting engineers.
