Black Sumer: The African Origins of Civilisation By Hermel Hermstein

The Sumerian Problem HAS BEEN SOLVED! And the solution is African! According to mainstream historians the Sumerians of ancient southern Iraq founded the world's first civilization. They are supposed to have spoken a language which is not genetically related to any known language. This is known as the Sumerian Problem. This book represents the greatest discovery in ancient history for the last hundred years. It demonstrates that Sumerian was genetically related to the Niger-Congo languages of West Africa. Their descendants are the African Diaspora of North and South America and the Caribbean. Many claimed to have solved the Sumerian problem in the past. Hermstein's differs from previous attempts by first showing the reader how to identify genetically related languages through recurrent sound correspondences in basic vocabulary. He then gives examples from acknowledged genetic relationships such as Germanic to show the reader what the evidence should look like. The author also shows what false correspondences look like and how to tell the difference. He also makes use of a number of tests that would determine whether languages are related using probability. This is CLEARLY UNLIKE ANY PREVIOUS ATTEMPT at solving the Sumerian problem. The author reconstructs the epic voyage that took the ancestors of the Sumerians from a homeland in West Africa to Djibouti before making a journey by sea, around Oman and to the head of the Persian Gulf. The other major discovery in the book is that the Sumerians had a much more advanced system of astronomy than has been supposed. The constellations had geographic associations in the Classical period through myth. Hermstein shows how the geographic coordinates of the associated places closely correspond to the celestial coordinates of certain points within the constellations. It is impossible to develop such a system without knowing the earth is round. The text supplying the point of origin for the system of geo-celestial coordinate correspondence is from the Sumerian period. Two amazing discoveries in one book. Both humanity and civilization have an African origin! The ancients knew a lot more than we realized!
