Editorial Review

Amazon.com Review

The first installation in the SAP Knowledge Book Series, *SAP R/3 System Administration* is a first-rate reference book that's much needed, as it hones in on release 4, the latest and much anticipated version of R/3. Author Liane Will's crystalline writing style is an essential element of this book's success. As she covers topics that range from understanding SAP's graphical user interface to archiving data appropriately, her down-to-earth tone makes the complex subject matter considerably less daunting. And as is typically the case with well-constructed reference guides, the pages are generously splashed with configuration commands, screen shots, and tables. The five appendices, which include a glossary, a bibliography, and pages devoted to menu structures and profile parameters, are a useful codicil as well.

In addition to the specific guidance offered on how to keep SAP R/3 running smoothly, this book is also designed to serve as a preparatory text for SAP's Certified Technical Consultant test. For example, each chapter ends with review questions similar to those that may appear on the test. You can try out the knowledge you've gleaned with the timed test engine on the bundled CD-ROM. *Sarah L. Roberts-Witt*

About the Author

Sigrid Hagemann has been with SAP Systems Integration AG in Bensheim, Germany, since 2001. She works in Business Consulting Technology in the areas of IT management and technology consulting. She supports SAP customers in the optimization of their system landscape operations. She first worked with SAP technology while completing her master's degree in Mathematics in 1993 at the Fujitsu Siemens Competence Center in Walldorf, Germany.

Liane Will is member of the SAP Active Global Support since 1998. She supports customers in implementing and optimizing operations and management of SAP solutions. From her extensive experience derived several books dealing with best practices in system administration. They were also published by SAP PRESS. Before Liane started working at SAP, she developed SAP database support tools.

Users Review
