Editorial Review

Review

"Pollock's workbook is a wonderful companion to any research methods course. It pairs nicely with other textbooks and reading material, and provides students with interesting datasets and detailed explanations on how to analyze data within SPSS. An invaluable guide for faculty and students alike it made my job teaching the class easier, but more importantly, it made my course better." -- Wesley Hussey "This book is an indispensable asset to any professor who teaches students about the foundations of quantitative analysis. Pollock sets the standard for providing in depth, accessible instruction on how to use SPSS to analyze data in political science." -- Brian Frederick "An IBM SPSS(R) Companion to Political Analysis complements The Essentials of Political Analysis and provides clear instruction for SPSS. The text is very accessible to students and uses interesting, varied, and lively examples. The four data sets - 2012 GSS, 2012 ANES, a 50 state dataset, and a 167 country dataset - engage students with a range of interests." -- Gary Copeland

About the Author

Philip H. Pollock III is professor of political science at the University of Central Florida. He has taught courses in research methods at the undergraduate and graduate levels for nearly 30 years. His main research interests are American public opinion, voting behavior, techniques of quantitative analysis, and the scholarship of teaching and learning. His recent research has been on the effectiveness of Internet-based instruction. Pollock's research has appeared in the American Journal of Political Science, Social Science Quarterly, and British Journal of Political Science. Recent scholarly publications include articles in Political Research Quarterly, the Journal of Political Science Education, and PS: Political Science and Politics.

Users Review
