Editorial Review

About the Author

I grew up in an age when being a geek wasn't quite as fashionable as it is today. I used to subdue my nerdiness growing up in the 90's and early 2000's because of a perceived stigma I associated with it. But today? Well, let's just say I let my geek flag fly! Whether it's a new gadget, scientific discovery, piece of hard-to-understand software, or a complex but highly applicable math equation--I love discussing it and teaching it in easy-to-understand language to my peers and readers.

These days I spend a great deal of my time learning and using different electronic devices and computer programs. I've found that the more I discover, the more I like to share with my readers. Plus, most electronics and computer technologies don't give you complete and user-friendly guidance--so I try to fill in the void as much as possible so you can benefit from it.

I also love staying current with the world of Physics and Science, so expect to see more titles in these genres in the future.

Thanks for visiting my page, and I hope I can provide you with tons of value in these books!

Users Review

From reader reviews:

Miles Towles:

Now a day those who Living in the era wherever everything reachable by interact with the internet and the resources within it can be true or not involve people to be aware of each data they get.
