Modeling Forest Trees and Stands By Harold E. Burkhart, Margarida Tomé

Drawing upon a wealth of past research and results, this book provides a comprehensive summary of state-of-the-art methods for empirical modeling of forest trees and stands. It opens by describing methods for quantifying individual trees, progresses to a thorough coverage of whole-stand, size-class and individual-tree approaches for modeling forest stand dynamics, growth and yield, moves on to methods for incorporating response to silvicultural treatments and wood quality characteristics in forest growth and yield models, and concludes with a discussion on evaluating and implementing growth and yield models.

Ideal for use in graduate-level forestry courses, this book also provides ready access to a plethora of reference material for researchers working in growth and yield modeling.

Editorial Review

From the Back Cover

Drawing upon a wealth of past research and results, this book provides a comprehensive summary of state-of-the-art methods for empirical modeling of forest trees and stands. It opens by describing methods for quantifying individual trees, progresses to a thorough coverage of whole-stand, size-class and individual-tree approaches for modeling forest stand dynamics, growth and yield, moves on to methods for incorporating response to silvicultural treatments and wood quality characteristics in forest growth and yield models, and concludes with a discussion on evaluating and implementing growth and yield models.

Ideal for use in graduate-level forestry courses, this book also provides ready access to a plethora of reference material for researchers working in growth and yield modeling.

About the Author

Dr. Harold Burkhart, University Distinguished Professor Department of Forest Resources and Environmental Conservation, College of Natural Resources and Environment, Virginia Tech University, Blacksburg, VA 24061, USA Interest Areas: Modeling forest stand dynamics, growth and yield; applying quantitative analysis techniques to forestry problems. B.S., Oklahoma State University (1965) M.S., University of Georgia (1967) Ph.D., University of Georgia (1969) Current research project Cooperative Research Program in Growth and Yield of Managed Stands of Loblolly Pine (Twelve industrial forestry firms plus Virginia Department of Forest Resources and Environmental Conservation and USDA Forest Service, 1979-present): The objective of this Cooperative is to develop loblolly pine tree growth and stand development models sufficiently flexible to account for the effects of intensive cultural practices, with output sufficiently detailed to allow for analyses of a full range of utilization options. The Cooperative maintains three large field studies: (1) a set of designed spacing trials, (2) a region-wide set of growth plots in intensively managed plantations, and (3) two pruning experiments and is part of the NSF Center for Advanced Forestry Systems.

Users Review

From reader reviews:

Jessica Rodriguez:

Reading a guide can be one of a lot of activity that everyone in the world really likes. Do you like reading book so. There are a lot of reasons why people fantastic. First reading a reserve will give you a lot of new information. When you read a guide you will get new information due to the fact book is one of a number of ways to share the information or maybe their idea. Second, studying a book will make an individual more

imaginative. When you looking at a book especially fictional works book the author will bring one to imagine the story how the character types do it anything. Third, you are able to share your knowledge to other folks. When you read this Modeling Forest Trees and Stands, you can tells your family, friends as well as soon about yours e-book. Your knowledge can inspire different ones, make them reading a reserve.

Sylvia Grable:

People live in this new morning of lifestyle always try to and must have the spare time or they will get great deal of stress from both lifestyle and work. So , if we ask do people have extra time, we will say absolutely indeed. People is human not just a robot. Then we ask again, what kind of activity are you experiencing when the spare time coming to you of course your answer will unlimited right. Then ever try this one, reading ebooks. It can be your alternative with spending your spare time, often the book you have read is actually Modeling Forest Trees and Stands.

Carlos Thornton:

Reading can called mind hangout, why? Because if you find yourself reading a book particularly book entitled Modeling Forest Trees and Stands your brain will drift away trough every dimension, wandering in each and every aspect that maybe not known for but surely will become your mind friends. Imaging just about every word written in a book then become one web form conclusion and explanation this maybe you never get ahead of. The Modeling Forest Trees and Stands giving you an additional experience more than blown away your thoughts but also giving you useful info for your better life within this era. So now let us explain to you the relaxing pattern here is your body and mind will likely be pleased when you are finished looking at it, like winning a. Do you want to try this extraordinary spending spare time activity?

Ruth Paiz:

Reserve is one of source of expertise. We can add our understanding from it. Not only for students but additionally native or citizen want book to know the update information of year in order to year. As we know those textbooks have many advantages. Beside all of us add our knowledge, may also bring us to around the world. From the book Modeling Forest Trees and Stands we can take more advantage. Don't one to be creative people? To be creative person must choose to read a book. Only choose the best book that suited with your aim. Don't always be doubt to change your life with this book Modeling Forest Trees and Stands. You can more pleasing than now.
