Investing: A Beginner's Guide To Investing

Wealth, they say it doesn't grow on trees, but the concept is just similar to how a tree grows i.e. it takes time. We all want to be wealthy but the problem is that we don't want to go through the process as a tree grows. We are looking for quick fixes and rags to riches stories that we read about every day don't make things any easier for us. Think about it; we all want to hear the stories of success but we don't want to hear about the stories of the number of times that those successful guys failed.

You will hear many of us say that they want to retire young and rich but the problem is that many of us are not doing much to get there. We simply have the hope that we will get that even if we do nothing at the moment. We tell ourselves that we will get rich, as if we will win some lottery. Well, do you know that many of those who win lotteries become poor in less than a decade? So, what is the secret to wealth creation?

The truth is that wealth is a factor of three simple things and this is time, savings and consistency. Each of these acts in its unique way towards growing your wealth and when you master how to ensure that these three are in constant balance, then you can bet that your retirement years won't be at the hands of social security or your sons and daughters.

If you want to create a "safety nest" for yourself, the time to act is now. But if you are uncertain about how to go about this journey to accumulating wealth as opposed to being liquid, this book will help you with everything you need to get started in the world of investing.

You will soon understand that hope shouldn't be a word you count on when it comes to investing; you will discover why taking action now, even if it means investing what you'd refer to as peanuts, is always better than hopping for a better tomorrow to invest.

Editorial Review

About the Author

Hi, my name is Tony Scott, author of "Managing and Budgeting Money: How to easily budget and manage your money in a simple step by step approach". I am an entrepreneur and businessman. I currently run three successful businesses. I am also a Chartered Accountant by profession. I decided to write my first self published book to help other people who are struggling in their financial life with managing money. This book will help them during this phase and provide them with guidance so that they can avoid the money mistakes that I made. I am extremely passionate about the contents of this book as it has changed my life dramatically and brought me financial freedom. I know exactly what it's like to go through life from paycheque to paycheque and not having any control of your finances. I know the feelings of frustration, depression and guilt that poor financial control has on your life. Your financial health is one of the most important areas of your life, as failure in this area generally has a huge negative impact in all other areas of your life like your relationships and health. I managed to get myself out of the financial mess that I was in through proper financial management. I will teach you the tools and techniques that I have used and also share with you a budgeting template that I still use. Please check out my books below. I hope you enjoy them!
