# Animation in HTML, CSS, and JavaScript

By Kirupa Chinnathambi

Animation in HTML, CSS, and JavaScript By Kirupa Chinnathambi

This book will help you create practical / usable / wickedly-cool animations in HTML, CSS, and JavaScript. Each chapter is filled with cleanly explained concepts, beautifully illustrated diagrams, colorific code snippets, and cringeworthy one-liners guaranteed to make your friend who laughs at everything groan.

You will start by learning how to create animations and transitions in CSS. Towards the end, you will learn how to create animations in JavaScript by manipulating DOM elements as well as pushing pixels on the canvas. Along the way, you will see numerous small and large examples explaining how what you are learning applies to what is done in the real world.

Your interaction with this book doesn't end when you put it down. If you ever get stuck or need a group of friendly people to help you out with your animation-related issues, get free online support, demos, video tutorials, and other good stuff on the author's site: kirupa.com

Editorial Review

About the Author

Ever since my parents brought home a computer in the early 1990's, I have enjoyed writing code and animating things on the screen. It's one of my few childhood hobbies (besides crying when things don't go my way and eating ice cream) that I still actively pursue.

Let's fast-forward a few years. In 1999, I decided to create a blog called kirupa.com (creative, right?) where I began to document tips, tricks, and other random information about how to use your computer to draw/create/animate and do cool things with it. Over the years, this little blog became one of the most popular places where web developers and designers came to learn more about Flash and other related technologies such as, most recently, the three musketeers: HTML, CSS, and JavaScript.

In parallel, my offline activities have kept me busy as well. For my sins, I was sentenced to four years of rigorous imprisonment at MIT where I majored in Electrical Engineering and Computer Science. Shortly after graduation, as part of a work-release program, I joined Microsoft as a Program Manager on a team that is currently known as Visual Studio.

When I am not writing or breaking things, I drink a lot of bubble tea, play video games, attend live music shows, set bonfires, watch movies, and hang out with friends. I'm pretty much the most awesome person that I know.

I am currently working on being more modest.

Users Review

From reader reviews:

Anna Chew:

In this 21st centuries, people become competitive in every single way. By being competitive right now, people have do something to make them survives, being in the middle of the particular crowded place and notice by simply surrounding. One thing that oftentimes many people have underestimated the idea for a while is reading. Sure, by reading a reserve your ability to survive boost then having chance to stand than other is high. To suit your needs who want to start reading a new book, we give you this particular Animation in HTML, CSS, and JavaScript book as nice and daily reading guide. Why, because this book is more than just a book.

Opal Moffett:

Now a day people that Living in the era exactly where everything reachable by connect to the internet and the resources inside can be true or not call for people to be aware of each information they get.
