On Competition, Updated and Expanded Edition By Michael E. Porter

For the past two decades, Michael Porter's work has towered over the field of competitive strategy. *On Competition, Updated and Expanded Edition* brings together more than a dozen of Porter's landmark articles from the *Harvard Business Review*. Five are new to this edition, including the 2008 update to his classic "The Five Competitive Forces That Shape Strategy," as well as new work on health care, philanthropy, corporate social responsibility, and CEO leadership.

This collection captures Porter's unique ability to bridge theory and practice. Each of the articles has not only shaped thinking, but also redefined the work of practitioners in its respective field. In an insightful new introduction, Porter relates each article to the whole of his thinking about competition and value creation, and traces how that thinking has deepened over time.

This collection is organized by topic, allowing the reader easy access to the wide range of Porter's work. Parts I and II present the frameworks for which Porter is best known--frameworks that address how companies, as well as nations and regions, gain and sustain competitive advantage. Part III shows how strategic thinking can address society's most pressing challenges, from environmental sustainability to improving health-care delivery. Part IV explores how both nonprofits and corporations can create value for society more effectively by applying strategy principles to philanthropy. Part V explores the link between strategy and leadership.

Editorial Review

Review

On Competition, a collection of works by Michael E. Porter, is a critical examination of the dog-eat-dog international economy. A Harvard Business School professor, Porter is one of the most respected and innovative economists of his time. Author of 15 books, he advises key elected officials and business leaders in all parts of the world. On Competition features 13 of his best articles over the past 15 years, including 2 new ones. The essence of Porter's message is that every company, country, and person must master competition to thrive in brutal international and domestic economies. Competition is the key to excellence. Worried about losing your job or your services becoming obsolete? Porter believes that a little fear is good for everyone. "Companies that value stability, obedient customers, dependent suppliers and sleepy competitors are inviting inertia and, ultimately, failure," he writes in his 1990 study and essay "The Competitive Advantage of Nations." Porter is a longtime critic of the short-term thinking on Wall Street that often stifles competition and hurts the economy. In "Capital Disadvantage: America's Failing Capital Investment System," he calls for much lower capital-gains rates for people who invest for the long term. He also urges investors and businesses to start thinking together. He contends that pension funds and institutional investors should get a greater say over the companies they own. It's wacky to have company directors with little expertise or financial interest in the company, he writes.

Porter is often unconventional and asserts that businessmen must be, too. In his essay "Green and Competitive," he shows little sympathy for businesses that complain about environmental regulations. Rules to protect the environment don't have to strangle companies--they can actually improve productivity with the right attitude and approach. Rhone-Poulenc, a French chemical and drug company, proved this when it stopped incinerating a certain byproduct and began selling it as an additive for dyes and tanning. Readable and provocative, On Competition is vital for business, government, and financial leaders as well as small-business people and investors. --Amazon.com, by Dan Ring, 1998 Review of the original edition

Twenty years of studying industry performance and competitiveness have convinced Porter, a professor at the Harvard Business School and a noted authority on competition and corporate strategy, that a successful company must not only adopt the best practices available but also differentiate itself from its rivals. In 13 essays, some of which have appeared elsewhere, Porter elegantly lays out a sophisticated analytical framework for assessing the challenges firms face in today's business environment. Although Porter offers no magic formula for success, as a starting point for developing a long-term strategy, he does recommend close scrutiny of "factor conditions," "demand conditions," other competing and supporting industries and existing strategies and structures. Porter shows how companies have bested international competitors by forging integrated global strategies, operating with a long-term outlook, investing aggressively and managing factories carefully. He has also come to see the growing importance of geographical location to specific companies and celebrates the benefits of clusters--systems of interconnected firms and institutions--for increased productivity and innovation. On the societal level, Porter's work, with its emphasis on long-term planning, brings a welcome new perspective to perennially thorny policy issues such as environmental protection, inner-city development and universal access to health care. While this book requires a serious investment of time and effort, its expert dissection of a very complex phenomenon is worth it. Line drawings throughout.

Copyright 1998 Reed Business Information, Inc. --Publishers Weekly's 1998 Review of the original edition

A highly respected academic and authority on strategy and competition, Porter draws together his articles on

competition, which together provide a rigorous and useful framework for bridging the gap between theory and practice. The book has three sections. The first takes on competitive strategy, evaluating strategies and weaknesses for business, while the second addresses the role of location in competition experienced by government entities. Porter notes that prosperity in both companies and countries depends on the nature of the local environment in which the competition takes place. With an understanding of domestic and international competition, part 3 offers insight into such societal issues as urban poverty, health care, and income inequality. Porter concludes that competition is certain to be evolving, unsettling, and the source of our prosperity. --Booklist's 1998 Review of the original edition

About the Author

Michael E. Porter is the Bishop William Lawrence University Professor at Harvard Business School. He is the author of seventeen books and numerous articles.

Users Review

From reader reviews:

Cassandra Martin:
